

LG V20™

Android 7.0 Nougat

Android's newest OS has been meticulously refined. Dual Window Display will have you multitasking like a pro. Updated notification features let you reply to messages instantly. Got sidetracked? Double tap to access the last app you were using.

Wide Angle Lens

Front and rear Wide Angle Lenses give you three times more room to fit everyone in the frame, while Auto Shot makes taking selfies a breeze - no buttons required.

HD Audio and Hi-Fi Quad DAC Audio

Capture spectacular moments every day with sound quality that matches your video quality. Get great sound with a wider dynamic frequency range using three intelligent mics and Hi-Fi Recording.

REDWALL

Unparalleled Security and Resistance to Hackers

The built-in Redwall Mobile® technology uses patented techniques to thwart all malware, making the V20 robust enough for mission-critical applications. Redwall is the only solution proven to be effective against advanced attackers and zero-day threats. From trusted boot to a re-defined standard of authentication, LG's built-in security protects you without slowing you down. Enterprise management makes it simple to create and deploy security policies, and deploy DoD-approved solutions with complete confidence.

Stop carrying multiple devices and use a single device in two, three, or more modes.

Safe and secure
from the
boardwalk to the
boardroom to
the battlefield...
